

SUMMARY

Software Engineering graduate with hands-on experience developing **web applications, SaaS products, and machine learning solutions**. Experienced in building **full-stack applications** using **React, TypeScript, Supabase/PostgreSQL, and Python**, alongside **process automation** and **internal software development** gained during an industrial internship. Developed real-world projects including a **multi-tenant restaurant QR menu SaaS** and a **computer vision classification system**. Strong **analytical and problem-solving skills**, with **native Arabic** and professional proficiency in **English and French**.

EDUCATION

Halic University — Istanbul, Turkey : Bachelor's Degree in Software Engineering

Bachelor: Software Engineering, with a practice-oriented focus on internships and team projects

Relevant Coursework: Computer Programming I & II, Data Structures and Algorithms, Object-Oriented Programming I & II

WORK EXPERIENCE

Founder & Manager — Tgarmicha — Online, Tunisia

- Founded and scaled a **cross-border e-commerce platform**, generating **TND 80,000+** in sales in less than one year while managing its digital and operational infrastructure.
- Built and optimized **automated workflows** for **inventory tracking, logistics, and operational data management**, using spreadsheets and acquisition metrics to support data-driven decisions.
- Managed **digital systems and performance analytics** across **Google Ads, Meta Ads, and TikTok Ads**, integrating campaign data, audience insights, and e-commerce metrics to optimize acquisition.

Internship — LEONI Wiring Systems — Sousse, Tunisia

- Developed **low-code applications** and **digital workflows** using **Microsoft Power Apps** and **SharePoint** to digitalize employee **training and induction tracking** processes.
- Contributed to the **automation of industrial tracking**, building **custom interfaces** that reduced manual paperwork and streamlined **operational data collection**.
- Designed **internal monitoring tools** and **data views** to help supervisors efficiently track **training progress** and **compliance metrics**.

PROJECTS

BonPlan — Multi-Tenant Restaurant QR Menu SaaS | React · TypeScript · Supabase · PostgreSQL · Vercel

- Designed and developed a **multi-tenant SaaS platform** for restaurant menu, product, pricing, and settings management through a dedicated dashboard.
- Built a responsive **customer-facing QR menu** with multilingual support, restaurant-specific URLs, product discovery, and category navigation.
- Designed the **Supabase/PostgreSQL architecture**, implementing tenant relationships, **Row Level Security (RLS)**, database migrations, and data isolation.
- Developed **restaurant management, ordering, analytics, and QR features** using React Query, TanStack Router, i18next, Tailwind CSS, Recharts, and Supabase SSR; deployed via **Vercel** and maintained with **Git/GitHub**.

Skin Cancer Classification — Deep Learning Pipeline | Python · PyTorch · ResNet50 · Computer Vision

- Built an **end-to-end deep learning pipeline** for skin lesion classification using **Python, PyTorch, and ResNet50 transfer learning**.
- Implemented a multi-stage **model training and fine-tuning pipeline** with custom data augmentation and feature extraction.
- Developed **model evaluation and inference workflows** using classification metrics and **test-time augmentation (TTA)** to improve prediction reliability.
- Currently developing a **production-ready serving system and integrated dashboard** to deploy the trained model in a live application environment.

LANGUAGES & SKILLS

Technical Skills:

- **Languages:** TypeScript, Python, Java, C, HTML, CSS
- **Frontend:** React, TanStack Router, React Query, Tailwind CSS
- **Backend & Database:** Supabase, PostgreSQL, Row Level Security (RLS)
- **Machine Learning:** PyTorch, ResNet50, Computer Vision, Image Classification
- **Development:** Object-Oriented Programming, Data Structures & Algorithms, Process Automation, Multi-Tenant SaaS Development

Languages: Native in **Arabic** (C2), Professionally Proficient in **English** (C1) and **French** (B2), with basic knowledge of **Turkish** (A2)

I hereby consent to the processing of my personal data in accordance with the Turkish Personal Data Protection Law No. 6698 (KVKK) for recruitment and employment purposes.
